Subject Index of Volume 166

Acetal gear pairs
wear behaviour of acetal gear pairs, 85
Antiwear mechanism
antiwear mechanism of zinc dialkyl dithiophosphates added to a paraffinic oil in the boundary lubrication condition, 17

Blasting erosion
wear resistance of Ni-hard 4 and high-chromium cast iron re-evaluated, 37
Bolted joints
analysis of the friction behaviour of bolted joints, 73
Brake shoe materials
investigation of tribological properties of brake shoe materials — phosphorous cast irons with different graphite morphologies, 179
Brittle materials
three-body abrasion of brittle materials as studied by lapping, 237

Ceramic-coated steels
friction and wear behavior of a number of ceramic-coated steels matched as sliding pairs to various surface-treated steels, 27
Coatings
coating thickness and surface roughness of TiN-coated high speed steel in relation to coating functionality, 127
Cold rolling
lubrication in cold rolling: elasto-plasto-hydrodynamic lubrication of smooth surfaces, 203
Conical thrust bearings
performance of externally pressurized conical thrust bearing under laminar and turbulent flow conditions, 147
effect of inertia forces on the performance of externally pressurized conical thrust bearings under turbulent flow conditions, 155
Contact fatigue
the effect of ferrite contents on the contact fatigue property of medium carbon alloy steels, 101
15%Cr white cast iron
effect of niobium on wear resistance of 15%Cr white cast iron, 197
Cu–Nb *in situ* composites
the mechanical and tribological behavior of Cu–Nb *in situ* composites, 133

Deformation
mechanics of friction in self-lubricating composite materials I: Mechanics of second-phase deformation and motion, 41
Diamond coatings
erosion resistance of diamond coatings, 7
Dynamic fracture strength.
effect of atmospheric humidity on the dynamic fracture strength of SiC abrasives, 93

Erosion resistance
erosion resistance of diamond coatings, 7

Expert system
the tribological failure diagnosis of spur gear by an expert system, 187

Ferrite
the effect of ferrite contents on the contact fatigue property of medium carbon alloy steels, 101
Fretting wear
a machine for fretting wear testing of plasma surface modified materials, 163
Friction pair
the unlubricated sliding wear of steels: the role of the hardness of the friction pair, 1

Grooving
wear resistance of Ni-hard 4 and high-chromium cast iron re-evaluated, 37

Hardening
investigation of the hardening of a titanium alloy by laser nitriding, 233
High-chromium cast iron
wear resistance of Ni-hard 4 and high-chromium cast iron re-evaluated, 37
High speed steel
coating thickness and surface roughness of TiN-coated high speed steel in relation to coating functionality, 127
Humidity
effect of atmospheric humidity on the dynamic fracture strength of SiC abrasives, 93
Hydro-abrasive erosion
hydro-abrasive erosion characteristics of 30vol.%SiC_p/6061–T6 Al composite at shallow impact angles, 55
Hydrostatic bearings
the dynamic characteristics of hydrostatic bearings, 215

Inertia
effect of inertia forces on the performance of externally pressurized conical thrust bearings under turbulent flow conditions, 155
Interfacial film
mechanics of friction in self-lubricating composite materials II: Deformation of the interfacial film, 49
Isotropic surfaces
determination of proper frequency bandwidth for 3D topography measurement using spectral analysis. Part I: isotropic surfaces, 221

Laminar flow
performance of externally pressurized conical thrust bearing under laminar and turbulent flow conditions, 147
Lapping
three-body abrasion of brittle materials as studied by lapping, 237
Laser nitriding
investigation of the hardening of a titanium alloy by laser nitriding, 233

Lubrication
lubrication in cold rolling: elasto-plasto-hydrodynamic lubrication of smooth surfaces, 203

Ni-hard 4 cast iron
wear resistance of Ni-hard 4 and high-chromium cast iron re-evaluated, 37
Niobium
effect of niobium on wear resistance of 15%Cr white cast iron, 197

Oxidation
the role of oxidation in the wear of plasma nitrided and PVD TiN coated steel, 119

Phosphorous cast iron
investigation of tribological properties of brake shoe materials — phosphorous cast irons with different graphite morphologies, 179
Pin-on-flat apparatus
wear and friction properties of prosthetic joint materials evaluated on a reciprocating pin-on-flat apparatus, 169
Plasma surface modified materials
a machine for fretting wear testing of plasma surface modified materials, 163
Prosthetic joints
wear and friction properties of prosthetic joint materials evaluated on a reciprocating pin-on-flat apparatus, 169

Raman spectroscopy
utilization of Raman spectroscopy in tribochemistry studies, 65
Rolling/sliding contacts
a fast method for the analysis of thermal–elasto-hydrodynamic lubrication of rolling/sliding line contacts, 107

Self-lubricating composites
mechanics of friction in self-lubricating composite materials I: Mechanics of second-phase deformation and motion, 41
mechanics of friction in self-lubricating composite materials II: Deformation of the interfacial film, 49
SiC abrasives
effect of atmospheric humidity on the dynamic fracture strength of SiC abrasives, 93
Spectral analysis
determination of proper frequency bandwidth for 3D topography measurement using spectral analysis. Part I: isotropic surfaces, 221
Spur gear
the tribological failure diagnosis of spur gear by an expert system, 187
Stainless steel
X-ray characterisation of eroded 316 stainless steel, 141
Steels
the unlubricated sliding wear of steels: the role of the hardness of the friction pair, 1
Surface-treated steels
friction and wear behavior of a number of ceramic-coated steels matched as sliding pairs to various surface-treated steels, 27

Thermal–elastohydrodynamic lubrication
a fast method for the analysis of thermal–elasto-hydrodynamic lubrication of rolling/sliding line contacts, 107
Three-body abrasion
three-body abrasion of brittle materials as studied by lapping, 237
Titanium alloy
investigation of the hardening of a titanium alloy by laser nitriding, 233
Turbulent flow
performance of externally pressurized conical thrust bearing under laminar and turbulent flow conditions, 147
effect of inertia forces on the performance of externally pressurized conical thrust bearings under turbulent flow conditions, 155

Wear resistance
effect of niobium on wear resistance of 15%Cr white cast iron, 197

X-ray characterisation
X-ray characterisation of eroded 316 stainless steel, 141

Zinc dialkyl dithiophosphates
antiwear mechanism of zinc dialkyl dithiophosphates added to a paraffinic oil in the boundary lubrication condition, 17
